MPE Multi Phase Extraction and Extraction of Groundwater (BTEX)

Location: near Bologna (Italy)

Task: Supply, installation and rental of a MPE Plant; Pump & Treat in 2 extraction wells

Contaminants: BTEX, TPH, MTBE

Flow Rate: 250 m³/h (Vapour); 4 m³/hr ground-water (2 wells)

Operation: since March 2006

Reference Projects

Inlet pipes from the 2 extraction wells and 4 MPE lines

4 header lines connecting the MPE wells to the inlet coupling of the container

Plant installed in a 20 ft container at the edge of a service area; 2 vapour phase carbon vessels made of steel installed outside the container
