SVE and Off-Gas Treatment (Catalytic Oxidizer)

Location:	near Milan (Italy)
Task:	SVE and off gas treatment (catalytic oxidizer)
Concentration:	>> 10 g/m ³ Benzene
Off Gas Limit:	< 5 mg/m ³ Benzene
Flow Rate:	< 250 m ³ /hr
Operation:	since Spring 2005

Reference Projects

Inlet of the plant (SVE); equipped with dilution system

Control panel of the plant (gsm, remote control, data recording) including a second LEL-system at the inlet of the catalytic oxidiser

LEL detection system (inline) and liquid separator (detonation proof)
